28 Apr 2023 CDDK20 Battery Electric 2,000 kg(4,409 lb) Triplex (3 Stage) 6,500 mm(256 in) Polyurethane / Vulkollan 1,850 kg(4,079 lb) 2,710 mm(107 in)

Mast full free lift Ride-on platform Charger

ADDITIONAL INFORMATION

Safety And Produnctivity • AC Motor eliminates replacement of carbon brush. • Multi-function display with BDI and hour meter. • Side way battery is easy to maintain. • Damping cushion for lownoise operation; • Emergency reversing device in the handle provides higher safety for the whole operation. • Auto deceleration function makes operation more safely. • Built-in pressure relief valve protects the trucks from overloads, increases the reliability. • Braking applied with handle upright and horizontal position, increasing the safety of the truck. • Emergency power disconnect switch. • Turtleshaped low speed switch. • Stepless speed control. • Supporting legs in both sides improve the lateral stability of the stacker. Optimum Structural Design • Low center of gravity ensures the stable operation. • Vertical driving wheel ensures convenient maintenance and small turning radius. Water-proof and dust-proof motor structure, keeps the braking and motor more durable and reliable. • The mast and the frame are dividable and exchangeable. • Full free lifting, fit for working in low roof house. Serviceability • Low voltage protection setting prolongs the battery life time. • The electronic components' concentrated design simplify the circuit and technology reduces wiring complexity and increase reliability. • Hall element reduces wear components, resulting in increased component life.
